The Statue of Gutenberg.

The statue of John Gutenberg, the eputed inventor of printing, erected t Mentz, his native city, testifies to the spect in which his memory is held by the posterity which enjoys the vast benefits flowing from his discovery. Gutenberg was born about 1400 and died in 1468. As early as 1438 he so far developed his art that he was able to engage in printing, but it was not until 1450 that he entered publicly upon the business. The number and chareter of the works printed by him have afforded a fruitful subject of controver sy, and there are those who even insist that the credit of the invention belongs as much to Faust and Peter Schoeffer as to himself. However this may be, his memory has been crowned with many honors, Strasbury Breslau, Jena, and many cities Germany are having centennialjul in commemoration of his work, nes in his honor.
